## Comb Binding

Of the many binding systems available, comb binding is by far the most popular. Quick and simple, comb binding suits a wide variety of user needs. It also offers total flexibility, you can bind the smallest document or a 450 page report with ease.

Comb binding is also a very practical binding method. Comb bound documents open out completely flat so they are ideal for presentations and easy to photocopy. The pages are completely secure yet easy to update, as sheets can be added or deleted when required.

Rexel comb binders make life even easier for you. They punch many more pages than other systems, yet require less effort. Documents can be bound much more quickly too, because of the unique, separate comb opening mechanism. The robust, all metal chassis and mechanism means you can use a Rexel comb binder day after day with superb results every time.

Rexel offers a comb binding system to meet every binding requirement, from a compact budget machine to the convenience of electric punch models. All will create professional documents in a matter of minutes.

## Wire Binding

Wire binding produces professional documents that not only look good but are also very easy to use. Wire bound documents are completely secure yet the pages open easily, can be laid flat or even turned through 360° for easy reference and photocopying. Wire bound documents are smart and business-like, just the right image for any organisation.

The Rexel range of wire binding systems is highly innovative, combining stylish good looks with exceptional performance. Incorporating the latest wire binding technology, these superb machines are the result of an extensive programme of market research, design and development.

Rexel is the leading brand for advanced binding systems and the wire binding range reflects Rexel's renowned expertise. All Rexel wire binding machines use the international standard 3:1" 34 holes punch pattern so that whatever the binding requirement, Rexel can offer a wire binder to suit. There's also a wide range of complementary binding mechanisms and covers to create individual, easy to use documents.

## Thermal Binding

Thermal binding is ideal for all kinds of documents, from instruction manuals to staff directories. It provides permanent protection for all your important reference material and the finished result is extremely smart. Thermal bound documents are neat and f l a t, making them easy to store, carry around and post.

Thermal binding is the ideal binding method when time is limited. Simply place the loose pages of your document into a thermal cover, wait a few seconds for the binding machine to reach temperature, then place your document inside. Within seconds you'll have a smart, permanently bound document.

Rexel thermal binders produce highly professional results with a minimum of effort. They sit neatly on a desktop, ready for use at any time. Using a Rexel thermal binder, you can also bind s everal documents at the same time, which makes the process even faster and more economical.

# Rexel Binding Range

Business communications are becoming increasingly sophisticated, and many offices now have access to desktop publishing

systems, laser printers and colour copiers. As a result, companies are producing their own sales material and documentation to an exceptionally high standard. However, any printed material will look more professional and have greater impact if it is presented as a properly bound document.

All Rexel binders have a 2 year guarantee.

## Hoш to choose your binder...

Rexel have a range of machines and supplies to ensure professionally bound documents can be produced quickly and easily in the home, school or office. Choose from smaller machines punching up to 5 sheets designed for personal use, to larger electric punching models punching up to 30 sheets. The range features a selection of user friendly features to make comb binding as easy as possible.

### "Flowline" concept

The larger machines use *Flowline Concept* to ensure a faster binding process. Flowline is the logical ergonomic process of producing a document – starting at the rear of the machine and completing the bound document at the front. The Flowline range of machines include some other specific features:

#### "Lowline" concept

Rexel use a patented comb clamp system to support the plastic comb when binding a document. This mechanism, provides a low and smooth design, efficiently clamping a comb in position.

#### "Simplyclick" system

A single or dual knob drives the comb opening mechanism. The mechanism is sprung to assist binding particularly large documents. Simply-click enables finger tip control during the opening and closure process.

#### TIP System

To help minimise the forces required punching numbers of sheets in document production. TIP system uses individual punches manufactured to the highest tolerances to produce a punch profile that helps maximise efficiency and reduce punching force.

# Comb Binding

### **CB105**

- Easy punch action for up to 5 sheets (80gsm) in a single action
- → Binds up to 90 sheet documents using 5mm to 12.5mm plastic combs
- Designed to operate with A4 and US letter format pages
- Rotary comb opening for control and convenience
- → Integral carry handle and security slot
- Starter kit included

CB206 Compact Comb Binder

- Suitable for the small office, at home or personal use.
- → Designed for A4 and US letter documents
- → Ideal for all popular comb binding applications.
- → Highly durable, robust construction.
- 10 sheet punch capacity
- → Binds up to 140 pages using all sizes of comb from 5 to 16mm
- → Adjustable edge guide
- Rotary comb opening
- Independent punching and comb opening functions for faster binding
- → Includes security slot, carry handle and stores vertically to save space
- Starter kit included

Wire Binder

### CB256

- → Binds up to 170 pages
- → Suitable for 5mm up to 20mm diameter combs
- → Uses standard 21 ring combs
- → Suitable for A4 size documents
- → Robust construction and modern design
- → Includes carry handle and stores vertically to save space
- → Comes complete with a starter kit of combs and covers

Punch handle stored in base

### **CB256e**

All the performance and features of the CB256 with Electric punching at the touch of a button.

### **CB305**

- → Binds A4 documents up to 175 pages
- → Uses plastic comb sizes from 4.5mm to 20mm
- → Precision edge guide adjusts to ensure accurate alignment
- → Document measure to determine comb size
- → Storage tray for plastic binding combs
- → Patented 'Lowline' comb grip system for greater safety
- → Plastic combs are opened with the 'simplyclick' system
- → High capacity waste container requires emptying less frequently
- → May be stored vertically to save space
- → Includes starter kit

## Comb Binding

### **CB345**

- Performance office comb binder
- → Punches up to 25 sheets each time
- → Translucent cover keeps work area clean and provides paper support during the punching process
- → Binds A4 documents up to 450 pages
- → Uses 21 loop plastic combs from 4.5mm to 50mm
- → Precision edge guide ensures accurate alignment
- → Document measure to determine comb size
- Covered storage tray keeps plastic binding combs ready
- → Patented 'Lowline' comb grip system for greater safety
- → Plastic combs are opened with the 'simplyclick' system
- → High capacity waste container
- → May be stored vertically to save space
- → Includes starter kit
